

# GARAGE FLOORING - V-8 HYBRID XT FULL CHIP VINYL SYSTEM

## Get the Ultimate Garage Floor!

Complete your garage with an industrial strength floor coating that will make you the envy of the neighborhood. The V-8 Hybrid XT Full Chip Vinyl System is unlike any system on the market. Utilizing a unique hybrid formula for superior bonding and durability, it stands above the rest! Make no mistake, this industrial hybrid formula consisting of polyurea and polyaspartic resins in not paint. Painted floors can chip and/or peel in a matter of months but the V-8 Hybrid XT Full Chip Vinyl System is strong, durable, and out-performs the competition in longevity, installation time, and chemical resistance-delivering a glamorous floor for the years to come.

## Why the V-8 Hybrid Full Chip Vinyl System?

- One Day Installation
- Vast Selection of Colors
- Only Installed by Certified, Trained Professionals
- Can be installed down to 0 degrees F
- UV Resistant; will Not yellow
- No Hot Tire Pick Up
- Industrial Strength
- Easy to Clean
- No Smell
- No VOCs

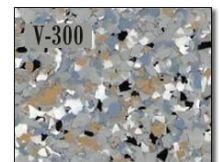

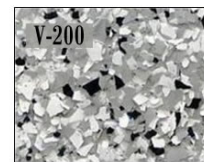

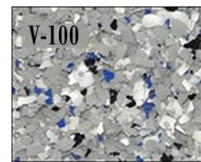

## Why a floor coating?

Coatings hide various imperfections on concrete garage floors such as pittings and discoloration. The full chip system is ideal for covering up ugly concrete, strengthening the floor, enhancing the room with color, and it makes cleaning a breeze!

## Others are Saying...

"I had a cheap coating installed in my garage and it lasted about 1.5 years before it started peeling off. I had a V-8 floor installed now for about two years, and it's still looking great! The crew was very professional and finished the job in the same day! I was very impressed with the service and the awesome floor!"
